

PROJECT PARTICULARS

The 2026 Street Improvements Project includes complete bituminous pavement reconstruction between the existing/new curb and gutter on 1st Avenue from 6th to 16th Street, and 17th Street from 4th to 6th Avenue. This will allow for corrective work to the subgrade that may be needed, including a new granular pavement base.

The project also includes replacement of water main on 17th Street, the addition of water main on 1st Avenue from 10th to 14th Street, and addition of storm sewer on 1st Avenue from 16th Street to 14th Street. Bituminous overlay with milling operations on 1st Avenue from 16th Street north to HWY 60 is also part of the project.
