

PROJECT PARTICULARS

The 2026 Street Improvements Project includes complete bituminous pavement reconstruction between the existing/new curb and gutter on 1st Avenue from 6th to 16th Street, and 17th Street from 4th to 6th Avenue. This will allow for corrective work to the subgrade that may be needed, including a new granular pavement base.

The project also includes replacement of water main on 17th Street, the addition of water main on 1st Avenue from 10th to 14th Street, and addition of storm sewer on 1st Avenue from 16th Street to 14th Street. Bituminous overlay with milling operations on 1st Avenue from 16th Street north to HWY 60 is also part of the project.

CONSTRUCTION UPDATE

Volume 1 | Issue 9 | June 19, 2026

Recently Completed

1st Avenue water main tied connected to existing water main.

Concrete poured at 9th Street and 10th Street intersections. Poured curb & gutter from 10th Street north to provide access to Hy-Vee Foods and Staple Oil.

Milled 17th Street and 1st Avenue north of 16th Street along with business parking lots to be milled overlayed.

Paved 17th Street.

Coming Up This Week

Connect water services from 10th Street to ~14th Street to new water main after pressure test and disinfection.

Install storm sewer from ~14th Street to United Prairie Bank.

Continue subgrade work from 14th Street to 16th Street.

Continue concrete work along 1st Avenue.

Coming Soon

Finish subgrade work on 1st Avenue.

Finish Storm Sewer north of 12th Street.

Install Water Level Control Structure at 6th Street.
