Project Name Livestock Building\Riding Rink

## Description

Total Project Cost: \$200,000

Construct a new livestock building that can be used for a riding area, house stalls for horse\livestock shows and be used for storage in the winter.

## Justification

Construction of a new building would provide an additional option for horse and livestock shows and reduce the City's dependency on the County Fair buildings for hosting events.

Project # BUILD 005

Project Name Blighted Homes Incentive Program

## Description

Total Project Cost: \$154,850

There are a number of dilapidated homes in Windom. We have discussed the possibility of a demolition program. The Housing Study estimated there are at least 12 homes in Windom that are in very poor condition and may be physically and/or functionally obsolete. Removing these old homes may be good for the neighborhood and may also create some infill lots that could potentially be redeveloped with single-family or twinhomes, particular lots located within walking distance of Downtown Windom. The Housing Study recommends exploring the potential to create a demolition program for dilapidated homes in Windom.

## Justification

Removing blighted homes will help to clean up neighborhoods and create buildable lots for new structures. Windom has a shortage of lots and infrastructure is expensive to build out in new subdivisions

## Budget Impact/Other

Cost of demolition is paid out based on the dollar amount of the new build. So the property will increase its tax base. If the property owner does not build the City will assess the taxes to recover costs.

Project # CH 008

Project Name Tuckpointing and Foundation Repair

## Description

Total Project Cost: \$125,000

Tuckpointing the brick exterior of the City Hall, former Fire Hall and Building\Zoning offices.

## Justification

Brick mortar is crumbling from many sections of the building. If left unchecked additional moisture will get in between the bricks and cause additional damage to the façade and foundation.

Building\Zoning, EDA Office and Council Chamber building in worst shape. Needs more immediate attention.

Project # EDA 003  
Project Name NWIP South 80 Addition Infrastructure

**Description** **Total Project Cost: \$425,000**  
Infrastructure for additional industrial park. 75 acre expansion along with streets and utilities of approximately 1,750 feet.

**Justification**  
In 2018, the EDA acquired the south 80 acres from Trotter. Infrastructure in Phase I was sized to handle Phase II including a mid-sized food processor. Phase II will be one large out-lot until a business is ready to move forward with a project. The businesses will identify the size of lot they need and the EDA can subdivide the property at that time.  
In 2020 half the property (40 acres) was sold to Scott Veenker Enterprises. There is a 5-year rule for TIF. Infrastructure may need to be extended for the additional future development. Funds can be used as a match for BDPI or other grants.

Project # ELE 023

Project Name Transmission Line Reconstruction

## Description

Total Project Cost: \$3,500,000

Reconstruction of Windom's transmission lines going both SW and NE from the power house to the inter-connection points with ITC. Approximately 3.5 miles of City owned transmission line.

## Justification

The existing transmission lines are at the end of their useful life (40+ years). These transmission lines bring power into the community. Two lines are maintained for redundant power to insure maximum reliability.

## Budget Impact/Other

Reserves will be used to fund the capital construction costs of the transmission lines to maximize our Attachment O return for transmission recovery. It is anticipated that the Attachment O recovery will return the \$3 million investment within 7-10 years and additional returns will continue on a declining basis for the 40 year life of the asset.

Project Name Fiber Optic Splicing Trailer

Useful Life 10 years

Category Telecom Equipment

Priority 2 Very Important

## Description

Total Project Cost: \$18,500

Mobile fiber lab in a pull trailer with climate control and power.

## Justification

In the field, fusion splicing should not be done in the open. The workspace should be controlled environment and clean. Fiber optic prep time is reduced, technician safety is improved. Fiber optic plant system is aged 15 years and components are degrading/failing which result in increased maintenance and rehab actions going forward. FOST paired with a core alignment fusion splicer will result in cost savings from Telecom staff performing FO maintenance, rehab, system expansion, shorten emergency restoration timelines instead of hiring contractors for the work. Potential revenue generated by offering splicing services to other local fiber optic service providers.
